

Hughes 9201

The fastest of the BGAN terminals, the HNS 9201 allows you to simultaneously send and receive IP packet and circuit switched data via USB, Ethernet, ISDN and WLAN interfaces over the Inmarsat BGAN satellite network.

The rugged design of the 9201 allows the terminal to be installed outside in extreme weather conditions for extended periods of time. Multiple user support allows your entire team to share a single 9201 simultaneously, providing the site with a broadband local area network.

The terminal's small size and weight allows you to easily move it from site to site and be connected again within minutes. When you're at a remote site, sending and receiving the information you need is critical, the 9201 offers a true alternative network that enables corporate teams to communicate their critical information - anywhere, anytime.

- 492 Kbps IP data (transmit and receive)
- Allows simultaneous use of all interfaces (Ethernet, USB, ISDN and WLAN)
- Multi-user capability (up to 11 simultaneous sessions)
- Selectable quality of service (33k, 64k, 128k or 256k)
- Full IP compatibility - email, file transfer (FTP), VPN, browsing etc
- Cost effective "always on" access - only charged for data sent & received

Hughes 9201 Specifications

Size/Weight	Size: 27.5cm x 34.5cm x 5.0cm Weight: 2.5Kg
Operating Temperature	-25C to +60C
Storage Temperature	-25C to +60C
Interfaces	Ethernet USB WLAN ISDN
What's in the box?	Broadband Satellite IP Terminal and WLAN Access Point Rechargeable lithium ion battery pack AC mains power adapter (110-240 VAC) Travel adapter USB cable Ethernet cable ISDN cable User guide Installation CD

Hughes 9201 prices excl VAT:

HUGHES BGAN Class 1 Terminal	CHF 5950.-
Extended life Li-ion battery	CHF 315.-
Spare AC mains power adapter	CHF 116.-
DC power adapter	CHF 130.-
